DATE MAILED: 05/23/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/751,138	Applicant(s) VERKAMA, MARKKU	
	Examiner Firmin Backer	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Response to Amendment

1. This is in response to an amendment file on February 3rd, 2005. In the amendment, claims 1-13 have been amended, no claim has been canceled, and claims 14-21 have been added. Claims 1-22 are pending in the letter.

Response to Argument

2. Applicant's arguments with respect to claims 1-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al (U.S. Patent No. 6,219,793) in view of Scott et al (U.S. Patent No. 5,311,596).

5. As per claim 1, Li et al teach an authentication method for telecommunications network including transmitting at least some of the challenges contained in the authentication data blocks to the terminal, choosing one of the challenges for use in the terminal, and based on the

Art Unit: 3621

challenge, determining a response and a key to be used with an aid of the identification unit of the terminal essentially in the same way as in a subscriber identification module of the mobile communication system, determining an authenticator with an aid of the chosen key in the terminals transmitting from terminal to the network authenticator and a data unit, the data unit containing information to the manner in which the authentication is formed and notifying the network with the aid of the data unit of which key corresponding to which challenge was chosen, and determining a check value with the aid of the chosen key in the network and comparing the check value with the authenticator (*see column 14 lines 15-line 65*). Li et al fail to teach an inventive concept of generating a set of subscriber specific authentication data blocks into the network, each data block containing a challenge, a response and a key, whereby the generation is performed in the same manner as in the a known mobile communication system. Scott et al teach an inventive concept of generating a set of subscriber specific authentication data blocks into the network, each data block containing a challenge, a response and a key, whereby the generation is performed in the same manner as in the a known mobile communication system (*see column 4 line 54-6 line 29, claim 1, 9 and 13*). Therefore, it would have obvious to one of ordinary skill in the art at the time the invention was made to modify the inventive concept of Li et al to include Scott et al's generating a set of subscriber specific authentication data blocks into the network, each data block containing a challenge, a response and a key, whereby the generation is performed in the same manner as in the a known mobile communication system because this would have provided secure access to a computer system.

Art Unit: 3621

6. As per claim 2, Li et al teach that the data unit is the SPI (Security Parameter Index) in the registration message of the Mobile IP protocol (*see column 14 lines 15-line 65*).
7. As per claim 3, Li et al teach that the value of the response determined at the terminal is inserted into the data unit (*see column 14 lines 15-line 65*).
8. As per claim 4, Li et al teach that the challenges are sorted in an order at the terminal with the aid of predetermined sorting criteria and a consecutive number corresponding to the chosen challenge is inserted into the data unit (*see column 14 lines 15-line 65*).
9. As per claim 5, Li et al teach that the identification unit used in the terminal is the subscriber identity module SIM used by the known GSM system and the said authentication data blocks are authentication triplets used by the GSM system (*see column 14 lines 15-line 65*).
10. As per claim 6, Li et al teach that the authentication triplets are fetched from the authentication centre AC of the GSM system (*see column 14 lines 15-line 65*).
11. As per claims 7, Li et al teach that the challenges to be transmitted to the terminal are transmitted by using a known short message switching service (*see column 14 lines 15-line 65*).
12. As per claims 8, Li et al teach that the challenges to be transmitted to the terminal are transmitted in an IP datagram to be sent through an IP network (*see column 14 lines 15-line 65*).

Art Unit: 3621

13. As per claims 9, Li et al teach that the authentication data blocks are transmitted to the home agent of the terminal and with the aid of the said data unit a message is given to the home agent about which key corresponding to which challenge was chosen, whereby the said check value is determined in the home agent (*see column 14 lines 15-line 65*).

14. As per claims 10-21, the recited subject matter is similar to claims 1-9 as indicated by the applicant. Therefore, they are rejected under the same rationale.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Firmin Backer whose telephone number is (571) 272-6703. The examiner can normally be reached on Mon-Thu 9:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on (571) 272-6712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
